WORK EXPERIENCE

Roebling – <i>AI-powered development and planning stack for industrial infrastructure</i> Co-Founder & Lead Software Engineer	Jun 2025 – Present	Remote
<ul style="list-style-type: none">Led early product development, platform architecture, and software team managementDesigned and built an industrial process simulator, symbolic equation solver, no-code modeling environment, CAPEX/OPEX engine, and collaborative version control system.Stack: React, TypeScript, Tailwind, Python, FastAPI, PostgreSQL, Supabase, Vercel, Langchain, PyTorch, GCP		
Synonym – <i>Biomanufacturing infrastructure and scale-up support</i> Senior Software Engineer	Apr 2024 – May 2025	Remote
<ul style="list-style-type: none">Architected and built Scaler, a process simulation and techno-economic assessment tool for biomanufacturingLed product development from idea to first revenue. Delivered 4 projects to a F500 customer, made key engineering hires, and ran investor demos. Helped enable a Series A raise and spinout of Roebling (see above).Stack: React, TypeScript, Next.js, Python, FastAPI, PostgreSQL, Supabase, Vercel		
Food for the Future – <i>Carbon crediting for sustainable food</i> Co-Founder & CTO	Jan 2022 – Dec 2023	Remote
<ul style="list-style-type: none">Built a platform for tracking food emissions based on purchasing data and calculating user carbon footprintsCollaborated with Verra to develop a sustainable food methodology and funded 3 pilots at K-12 schools		
Singularity Energy – <i>Data platform for tracking grid emissions</i> Software Engineer	Feb 2022 – May 2023	Somerville, MA
<ul style="list-style-type: none">Led development of Singularity's grid forecasting product, data API, and customer-facing utility dashboardsStack: React, TypeScript, Python, FastAPI, PostgreSQL, Terraform, AWS		
Skydio, Optimus Ride, Adaviv, Kespry – <i>Various robotics and computer vision companies</i> Software Intern – Autonomy / Perception	2018 – 2019	Redwood City, CA / Boston, MA
<ul style="list-style-type: none">Skydio: Developed the first prototype of the “3D Scan” product (C++/Python)Optimus Ride: Developed computer vision tools to autogenerate lane and curb maps from LiDAR scans (C++)		

EDUCATION

Massachusetts Institute of Technology MEng, Artificial Intelligence (Paper) – Robust Robotics Group	2019 – 2020	
Massachusetts Institute of Technology Bachelor of Science, Computer Science	2015 – 2019	Cambridge, MA

CERTIFICATIONS, SKILLS & INTERESTS

- Languages:** Python, Typescript/JavaScript, C++, C#, R, MATLAB
- Web:** React/Next.js, Redux, Tailwind, FastAPI, PostgreSQL, Terraform, Supabase, Vercel, AWS, GCP
- AI/Robotics:** C++, PyTorch, OpenCV, ROS/LCM, GTSAM, Unity3D, PydanticAI
- Strengths:** Zero-to-one product ideation, multidisciplinary engineering, techno-economic modeling, navigating early-stage startup uncertainty. Broad domain experience across robotics, energy, agriculture, climate-tech, biology, and software engineering.
- Interests:** Triathlon, Type 2 fun, [writing](#)
